INTRODUCTION

Florida Anesthesia Administrators' Association (FAAA) is a state-wide group of anesthesia and pain management related employees comprised of administrators, physicians, office and billing personnel.

FAAA was organized in 2001 with the intention of updating our members regarding important anesthesia and pain management practice information and to advocate anesthesia and pain management practice issues in partnership with physicians, bringing the clinical and business aspects of these specialty services together.

FAAA offers a unique opportunity to become part of an organization that understands and strives to address the many issues that affect the anesthesia and pain management industry in Florida. We have successfully worked with major Florida carriers, including Blue Shield, Medicaid and Workers' Compensation.

GOALS

- Build membership to represent an overwhelming majority of anesthesia and pain management offices in the State of Florida.
- Provide effective, ongoing education for members by holding educational meetings throughout the state with Florida carriers, as well as meeting once a year in conjunction with the Florida Society of Anesthesiologists (FSA).
- Utilize internet technology to create a communication networking system to keep members up-to-date regarding important information directly related to anesthesia and pain management.
- Establish a positive legislative environment to help educate and convey issues directly related to our FAAA members.

BENEFITS

The FSA has been extremely supportive of our organization; however, we cannot exist without the support of individual physicians and their offices. We firmly believe in the importance of networking for ourselves, as well as for your staff. This support system is an important step toward keeping in touch with the ever-changing rules, regulations and trends in anesthesia and pain management.

Joining is easy and well worth this small investment. The benefits to your organization are enormous! An up-to-date, well-trained and educated staff will serve you and your business well, whether you are in a large group or a solo provider.

Membership is affordable at \$150 for new membership and \$125 for renewing membership.

Please note the link below has not been updated for the current membership rates. You can still use the form from the link, but will need to send the correct amounts!
